

# Arial® Emergency and Nurse Call

## SOLUTION OVERVIEW

Empower caregivers, improve workflow and staff productivity, and improve the overall resident experience

### SOLUTION BENEFITS

- **Centralized notifications:** Integrated with WanderGuard® BLUE Wander Management, EHR systems, motion and smoke detectors, door sensors, temperature monitors and more.
- **Arial Resident:** Save unnecessary steps, accurately prioritize care, and give residents the reassurance that they've been heard with real-time alarm context through wireless, two-way voice communication between caregiver and resident.
- **Arial Caregiver:** Eliminate the need for an additional communication device or cellular plan. Alerts are sent with complete information on the resident and location. Caregivers can see who is responding, coordinate care via text or voice within the app, track time, and document services performed on the go.
- **Arial Analytics:** Make informed operational, care and financial decisions to benefit your community and residents using critical data, automatically pulled into reports and dashboards from all your managed communities.
- **Security and access control:** Eliminate the need for a separate access control system, using Arial to control access and credentials.

### CHALLENGES

Delivering a safe, secure environment for residents is always a top priority. But staffing challenges, occupancy struggles, and the demands of doing more with less (while maintaining quality care and services) plague many senior living communities.

### SOLUTION

Securitas Healthcare offers the widest range of reliable and accurate emergency and nurse call solutions with both wired and wireless options and solutions certified to meet UL 1069 and UL 2560 regulatory requirements.

Arial solutions empower caregivers with better visibility to residents' needs through extensive alerting, notification and reporting capabilities. Arial also offers advanced capabilities that communities can use to engage and empower caregivers, improve workflow and staff productivity, and improve the overall resident experience.

### HOW IT WORKS

With Arial, communities have information at their fingertips regarding not only response times and the number of alarms, but also who is responding, how much time caregivers spend with a resident, and details about the encounter.

Plus, respond to alarms with voice calls directly into a resident room with Arial Resident for critical context. Arial Caregiver on mobile phones empowers caregivers to coordinate care and efficiently respond to resident needs while documenting encounters and services wherever they are. Documentation of services provides visibility beyond standard response time and captures the services that improve quality of life.

Arial provides a single source for emergency call, UL 1069 nurse call, wander management, facility monitoring, environmental monitoring, fire panel integration, access control and building automation integration and fall management integration.

# Arial® Centralized Alarm Management and Reporting

A powerful solution to ensure resident safety and security

“The [Arial] product as a whole is better with every extra piece tied into it. The fact that everything interacts, communicates, and comes together to give us the data that we need really improves our efficiency as a company.”
