Securitas Healthcare

Environmental Monitoring

SOLUTION OVERVIEW

A better way to safeguard pharmaceuticals, vaccines and more

SOLUTION BENEFITS

- **Simple, real-time visibility:** Easily monitor asset condition and trends from a single dashboard
- **Streamline regulatory compliance:** Every reading and event is stored and time-stamped, corrective actions are easily logged, and reports are a click away.
- **VFC and COVID vaccine compliance:** Complete twice-daily checks with just a push of a button.
- **Rapid ROI:** One vaccine refrigerator unplugged or flooding in a lab can mean an expensive loss. With real-time alerts, you can intervene before damages occur.
- **Support patient safety:** 24/7 monitoring of items and spaces such as OR and compound pharmacy requiring finite ambient temperature and humidity.
- **Unified platform:** Supports multiple solutions.

CHALLENGES

Manual environmental monitoring is labor-intensive and prone to human error. Lack of 24/7/365 coverage results in high spoilage and damage costs and patient safety risks. Paper reporting and audit preparation is time-consuming and can potentially lead to non-compliance fines.

SOLUTION

Wireless monitoring provides around-the-clock coverage and real-time alerts to proactively address environmental changes before damage, loss or patient safety issues occur. Powerful reporting and analytics simplifies regulatory compliance and provides data-driven insights for better operational decision making and process improvements.

HOW IT WORKS

Install sensor tags in refrigerators or freezers or on walls for ambient temperature and humidity monitoring. Use contact sensor tags for door and window open/closure or motion, smoke and flood detection. If conditions deviate from set ranges, the system issues smart, real-time alerts so staff can quickly respond and easily log corrective actions.

COST-EFFECTIVE, END-TO-END SOLUTION

- Coverage across your Wi-Fi network; no fixed wiring.
- A wide range of tags available from temperature (including VFC and COVID-19 vaccine), humidity, voltage and dry contact sensors.
- ISO 17025 accredited program to manage all NIST-traceable tags.
- Easy compliance with flexible reporting and data stored for 5 years.

"The enhanced application simplifies our staff's workflow for monitoring assets, alert management and corrective actions—all in one place—with built-in access to customizable analytics and reporting making regulatory compliance easy."

– Mark Cornelius
Director, Clinical Engineering
TidalHealth Peninsula Regional

Wi-Fi-based simplicity + accuracy

Tag → Monitor → Alert/ Correct → Report

Multiply your ROI with productivity gains and loss prevention

3 MONTH ROI

ONE DAY OF LABOR
saved per week for every 15 devices

$40K

ANNUAL SAVINGS
by eliminating third-party monitoring fees

$120K

SAVED IN MEDICATIONS
when a refrigerator was accidentally unplugged

$400K

SAVED IN MEDICATIONS
and vaccines in the first 6 months alone

$1.7M

LIFETIME SAVINGS
in loss avoidance and productivity improvement

1 source for everything you need to transform Environmental Monitoring: Hardware, software with interoperability, analytics and managed services. Powerful platform for multiple RTLS solutions.

About Securitas Healthcare
Securitas Healthcare empowers caregivers to deliver connected, productive and safe care. Its innovative portfolio of healthcare solutions helps over 15,000 hospitals, clinics and senior living organizations worldwide protect people, use assets efficiently and understand their operations for a caring and healing environment. Securitas Healthcare is proud to be part of Securitas, the world's leading intelligent protective services partner. For more information, visit us at **securitashealthcare.com**
