Securitas Healthcare

Asset Management

SOLUTION OVERVIEW

Reduce costs and transform management of mobile assets

SOLUTION BENEFITS

- **Cost savings:** Real-time inventory visibility helps right-size fleets to reduce purchases and rentals. Shrinkage control saves thousands annually.
- **Caregiver efficiency:** Eliminate stress of hunting for a needed device—and the hoarding that often results. Slash search times to as little as 2 minutes.
- **Improved patient care:** Ensure critical equipment is available and maintained properly. Retrieve recalled assets within hours—before they're used on a patient.
- **Increased asset utilization:** Total visibility to where each asset is used improves asset allocation, optimizing utilization with real-time PAR Level management.
- **Flexible technology:**
  - Wi-Fi
  - BLE
  - Ultrasound
  - Low Frequency

CHALLENGES

Hundreds of hours spent searching for equipment. High-value assets lost, stolen or misplaced. Poor utilization. Unnecessary rentals and purchases. Delays in patient care as caregivers wait for what they need.

SOLUTION

Automates manual processes for managing capital and rental equipment so staff can easily see the location and status of assets in real time. Capture and analyze data about how assets are being used—and apply those insights to make better in-the-moment decisions and long-term improvements. Integrate with CMMS and medical devices to extend visibility and deepen understanding of equipment distribution, utilization and recall management.

HOW IT WORKS

Secure a tag to valuable equipment for location visibility. Asset location and status are automatically logged and monitored, using visual controls on PCs or mobile devices to quickly find assets and plan workflows.

Configurable, real-time alerts notify teams of important events, including PAR Level replenishment needs, potential shrinkage, and maintenance requirements, helping ensure assets are available, properly managed, and ready for use.

Asset data is transformed into powerful insights to better understand inventory levels, distribution needs and asset utilization.

The value of advanced Asset Management

90%
REDUCTION in time searching for equipment

$1.4M
SAVED by avoiding equipment loss and replacement costs

100%
DEVICE REMEDIATION within 5 days for 800 infusion pump fleet

100%
COMPLETION pump monthly maintenance in less than a week

$250K
INITIALLY SAVED avoiding purchase of more pumps

66%
REDUCTION in delays in patient care due to available infusion pumps

$42K
SAVINGS PER YEAR reducing unnecessary rental of specialty beds

30 MINUTES
MORE TIME a nurse spends on care if pumps are available

"Currently, we have close to 16,400 assets tagged in seven hospitals. So far, we've saved close to $9 million in devices, medications and food."

– Edgar Newell, Assistant Vice President, RWJBarnabas Health
