Securitas Healthcare

RTLS PLATFORM

Staff Rounding

SOLUTION OVERVIEW

Digitize and automate staff rounding to improve efficiency, support compliance, and help ensure patients receive consistent, timely care

EXPECTED OUTCOMES

- **Save valuable staff time** by reducing manual rounding documentation
- **Improve compliance** with established rounding protocols
- **Quickly identify missed or overdue rounds**
- **Gain greater visibility** into rounding performance across staff, rooms and units
- **Flexible technology:**
  - Wi-Fi
  - BLE
  - Ultrasound
  - Low Frequency

CHALLENGES

Consistent rounding is essential to quality patient care, communication, and the overall patient care experience, but manual processes can make it difficult to know whether rounds are happening on schedule. Staff may spend valuable time documenting activity, while nursing leadership has limited visibility into missed rounds, performance trends, and opportunities for improvement.

SOLUTION BENEFITS

Automate rounding activity

Automatically capture and update the status of patient room rounds, reducing manual documentation and helping maintain accurate, current information.

Improve staff efficiency

Give caregivers greater visibility into where rounds are required and help reduce the time spent tracking, documenting, and coordinating rounding activity.

Identify missed rounds

Easy-to-view dashboards show completed, upcoming, and missed rounds so staff can determine where attention is needed quicker.

Measure performance

Monitor rounding activity, staff averages, and unit-level metrics to observe performance and identify opportunities for improvement.

Staff Rounding platform functionality

REAL-TIME ROUNDING VISIBILITY

- **Automated round status.** Automatically update the status of each patient room round as activity occurs.
- **Rounds due.** See which patient rooms are approaching their scheduled rounding threshold.
- **Missed rounds.** Quickly identify rounds that have not occurred within the expected timeframe.
- **Privacy assurance.** Use de-identified patient names while maintaining visibility into rounding activity and compliance.

CONFIGURABLE ROUNDING WORKFLOWS

- **Custom rounding threshold.** Define rounding frequency by room based on patient needs or organizational protocols.
- **Flexible care requirements.** Adjust thresholds as patient needs change rather than applying one schedule across every room.
- **Real-time updates.** Keep rounding information current so teams can respond quickly when attention is needed.

REPORTING AND ANALYTICS

- **Staff metrics.** Monitor which staff members completed rounds and view real-time rounding averages.
- **Unit metrics.** Compare rounding activity across multiple units via a central dashboard to gain broader operational visibility.
- **Performance trends.** Use rounding data to identify areas for improvement and reinforce consistent care practices.
- **Leadership visibility.** Give nursing and operational leaders a clearer view into rounding compliance without relying on manual reporting.

1 source for everything you need to transform Staff Rounding: Hardware, software with interoperability, analytics and managed services. Powerful platform for multiple RTLS solutions. **Securitas Healthcare.**

More visibility. Less manual work.

Automated rounding helps staff spend less time tracking activity and gives nursing leadership greater visibility into whether recommended rounds are being completed.

The Staff Rounding solution combines location and staff availability data into a shared view, so teams can set rounding standards and alerts when timelines between staff rounds have exceeded benchmarks.

Configurable alerts can prompt a patient visit, and historical reports can reveal where rounding standards are not always met.
